ABOUT US

Founded in 2018 by industry veterans, Platinum Arch is focused on delivering outstanding storage tank products and services to customers in a variety of industries across the United States.

Platinum Arch Manufacturing and Construction's long-term goal includes managing 'in-house' the various aspects of manufacturing and production. The ability to have full control of the many manufacturing processes enables us to consistently produce premium quality products and services.

Equal with quality control is production efficiency, lower lead times, highly competitive prices, and the crucial ability to respond and expedite the potential production and schedule changes of our customers and partners.

OUR SERVICES

Field Fabrication

We manufacture and construct tanks up to 7,000,000 gallons in the field at your site. All projects are managed and completed to our demanding safety and quality standards. Whether your tank is certified API 650 or API 653, Platinum Arch will meet all code and operational requirements. Just tell us what you need and we will make it happen.

Shop Fabrication

Our shop fabricated tanks range in size from 1,500-gallons to 50,000-gallons and are constructed in our facility in Stillwater, Oklahoma. When the tanks are complete, Our central location in Stillwater, Oklahoma makes us ideal for providing lower shipping costs to both coasts—and all points in between.
